

Hand-Held Metal Detector

B2scan MS2000

B2scan MS2000 – is an advanced hand-held metal detector designed to ensure safety in public places.

The main scope of application is the search and detection of prohibited metal objects, ferrous and non-ferrous metals.

Strong noise immunity, high sensitivity. Smooth adjustment of sensitivity.

There is a silent mode of operation. Duration of work on one battery is up to 200 hours.

A dynamic beep changes the pitch depending on the mass of the object.

Technical parameters:

- Overall dimensions: 410 (l) × 80 (w) × 42 (h) mm
- Weight: 400 gr
- Operating voltage: 9 V
- Operating current: 5 mA
- Power: 6F22 battery2

Object detection distance:

- PM type gun: 200 mm
- Steel plate: 150 mm
- Knife: 150 mm
- Clip: 50 mm

The equipment has passed compulsory and voluntary certification applicable on the Russian Federation territory. Technical parameters and complete set of goods are subject to change without notice.
